#### **Overview**

The **Lepton**<sup>7</sup>**x4-USB** (Model R7104CU), an embedded reader of the easy2read<sup>©</sup> product line, is an ultra compact reader for low power, high performance RAIN RFID applications.

With programmable output power from 10 dBm to 30 dBm, the reader can detect tags at more than 5 m of distance (depending on antenna and tag dimensions).

Due to its high power and sensitivity, the module is well suited to design industry-leading, dense tag environment RAIN RFID readers.

The radio frequency core of the module is based on the **Impinj E710** IC that permits to achieve fast reading speed and to be used in dense reader and dense tag environments for top-class rated performances.

The compactness of the device allows to embed the **Lepton**<sup>7</sup>**x4-USB** inside industrial readers, and other compact form factor devices.

The **Lepton**<sup>7</sup>**x4-USB** complies with and can operate in both European and US regulatory environments and, thanks to its multiregional capabilities, it's ideal for integration in devices requiring compliance to different geographical regions.

The **Lepton**<sup>7</sup>**x4-USB** is designed on the basis of the **Lepton**<sup>7</sup> with the aim to facilitate the integration for those who prefer to use connectors instead of automatic manufacturing required by the SMD form factor.
